What is a desert?

Have you ever seen a desert? Have you seen a cactus? A desert is a sandy place. It is very hot in the desert. It is dry and there's no rain. At night some times it is cold.

What is a food chain?

Adaptation in deserts

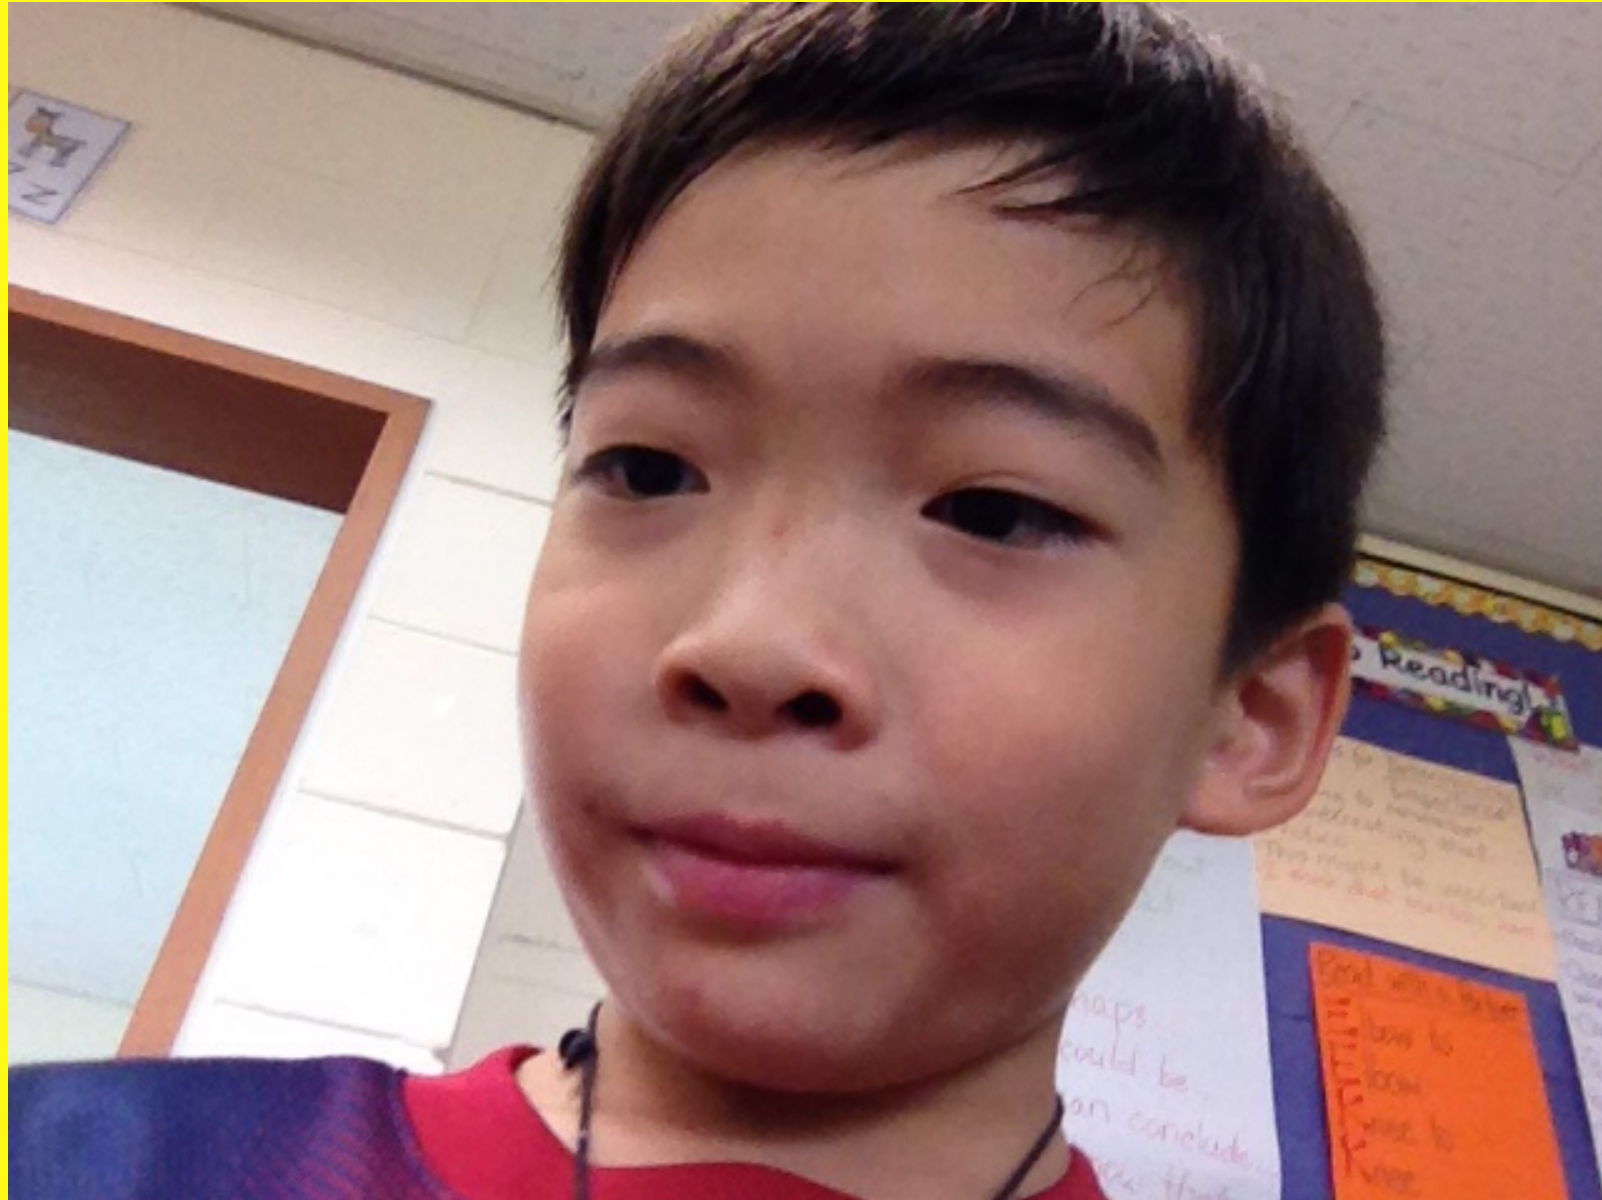

Animals can camouflage to live in the desert. Like a desert snake it can be camouflaged in the sand. To live in the desert.

Desert in danger!

**People kill animals in the desert than
the number of the animals will be
disappearing! People
bring goats to the desert because they
need clothes, milk and food. But the
goats eat
everything like plants. The Desert is
important because it is fun to go there.**

Daniel is a first grader his school's name is BIFS.He likes his school.Daniel made this story because to teach you about deserts. I hope you like this story!

Glossary

Desert a habitat that is hot and dry in the day.Deserts can be cold at night.

Food chain is when a animal eats another animal and another animal until it's stops.

Camouflage is when a animal blands in to some thing.Like sand.
