# Welcome to the ocean!

What is very quiet? Where does fish live? Where seaweed come from?

Where does plankton live. It the ocean!!!

# WHAT IS AN OCEAN

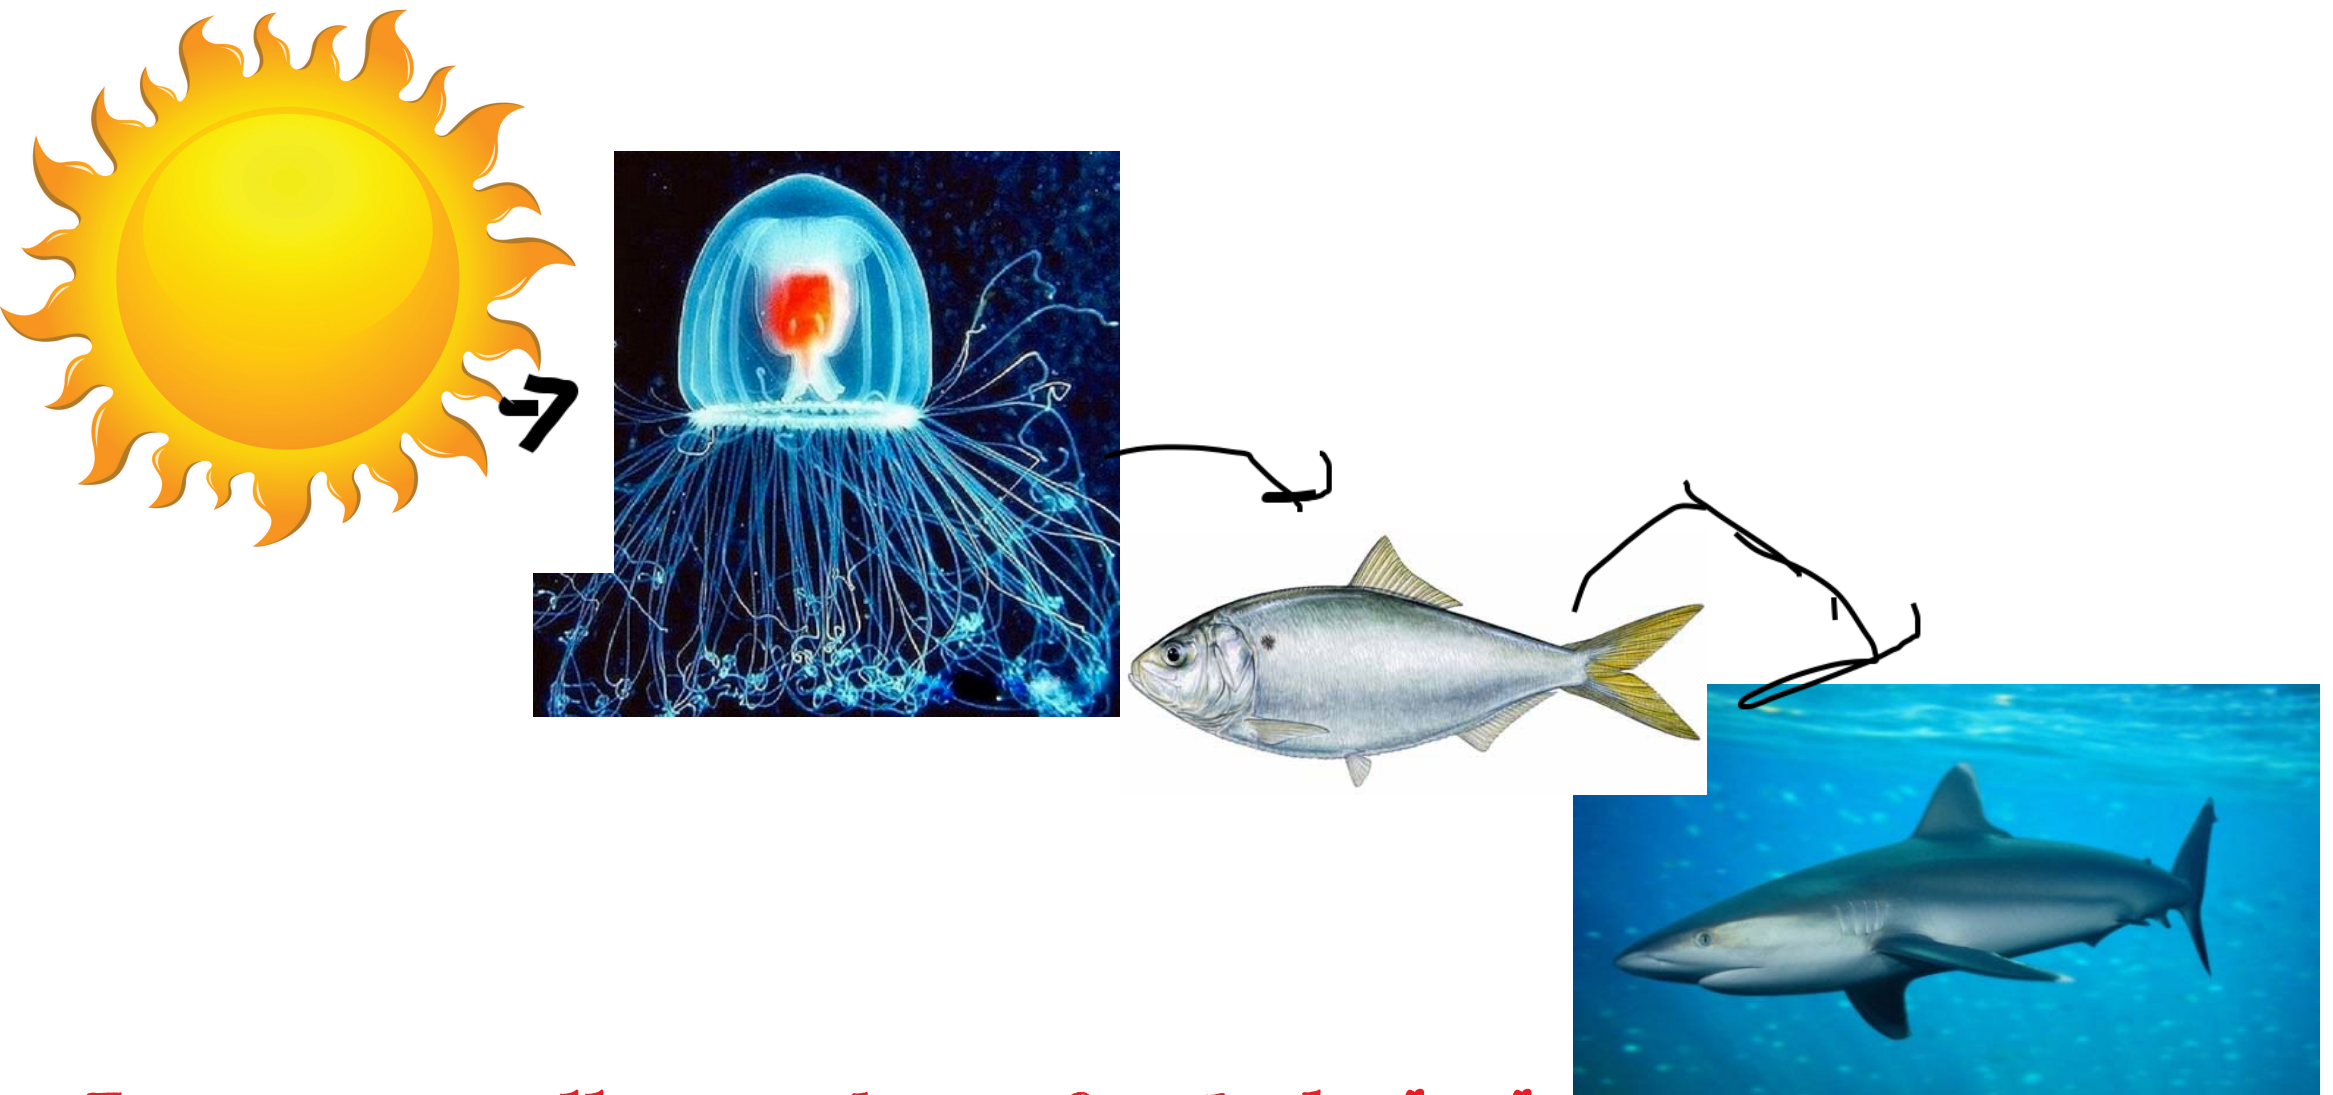

Oceans are everywhere. Oceans are very colorful. Some ocean can be cold. Some ocean can be hot. You can swim in the ocean. Some ocean have lots of rocks.

# Animals in the ocean

There are many living things live in the ocean. Shark, turtle, lobsters, salmon are living things. There are non living things also in the ocean like rock, and sand.

# OCEAN HUNTER

I want to tell you about food chain in the ocean.

Zooplankton like immortal jellyfishes eat

Phytoplankton. Small fish eat the immortal jellyfish.

A bigger fish eat the small fish.

# ADAPTATION

Woobegong sharks camouflage to protect themselves do any color. Some fish can not eat.

They hide in rock to catch prey.

# OCEANS IN DANGER

If people throw trash in the ocean then some fish will die. So you can not throw trash in the ocean!!! But if some not throw trash in the ocean, then fish will not die. Somebody trash in the trash in the trash can it not die too!!! So you can't trash in the that animal live there.

# About author

My name is Hayata. I'm in the first grade 1 and I am 7 years old. I am working hard for my book about ocean. I hope you enjoy my book!

# Glossary

*Adaptation: Animals that camouflage to blend in its surroundings.*
