

All about oceans

What is an ocean?

What is blue? What is quite?

Where can you see sharks?

where can you see the Sharks it's
the ocean

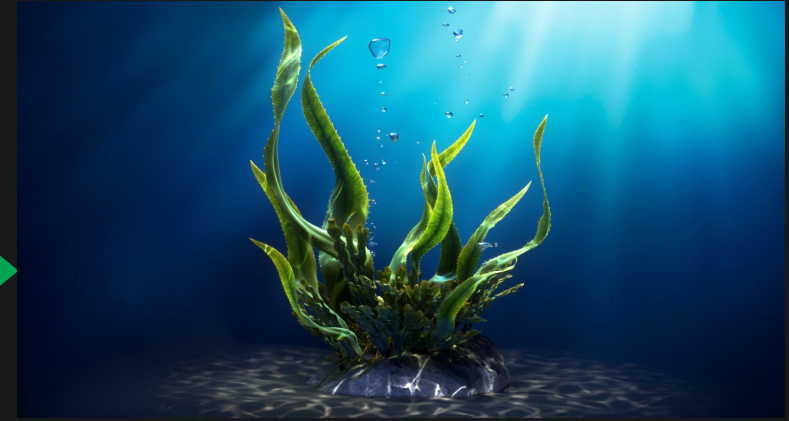

Where you find oceans

Oceans have salty water. Oceans are all over the place. Some oceans have lots of fish. There are lots of different oceans like Pacific Ocean and Indian Ocean ATLANTIC ocean and also Arctic Ocean.

What's for lunch

Adaptation

Many animals have adaptations. An adaptation is how all animals survive in the ecosystem for example a Wobegong shark is like a rock so it can eat a fish

Ocean in danger

I see many people throw plastic in the sea.
Plastic is bad for sea animals! Also lots of
sea animals die because of the plastic!
We protect ocean by not throwing plastic!

About the author

Hojoon is in the first grade. I wrote about the ocean. I worked hard on my book. I hope you enjoy my book!
