## ANIMALS IN THE RAIN FOREST

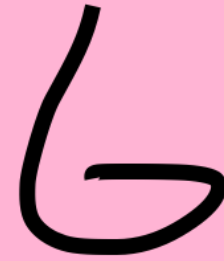

In the rain forest there are lots of animals there are legerd Buterfly and moncky and more. Some animals in the rain forest are very good at claiming.

Monkey found in the canopy a canopy is the top of the rain forest. A jaguar lives in the under story the under story is the midol of the rain forest. Dark blue frog lives in the forest floor the forest floor is way down in the bottom of the rain forest.

# ADAPTATION

## HIDE OUT

Adaptation is ways for animals to protect their selves.

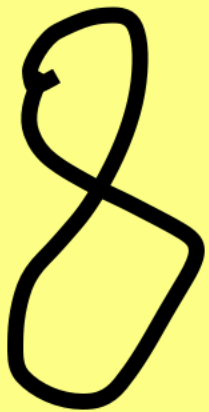

The dark frog is blue  
Because to warn the  
Animals not to eat them.

I want to tell you about  
rain forest food chain.  
Butterflies eat flowers  
berds eat butterflies  
jaguwires eat berds.

# The food chain life

10

forest is in  
danger

Don't cut down the beautiful trees.  
they are the rain forest trees. When you  
go to the rain forest please don't cut  
down to many trees plant more trees  
than cut down and don't kill animals at  
the rain forest.

# Glossar

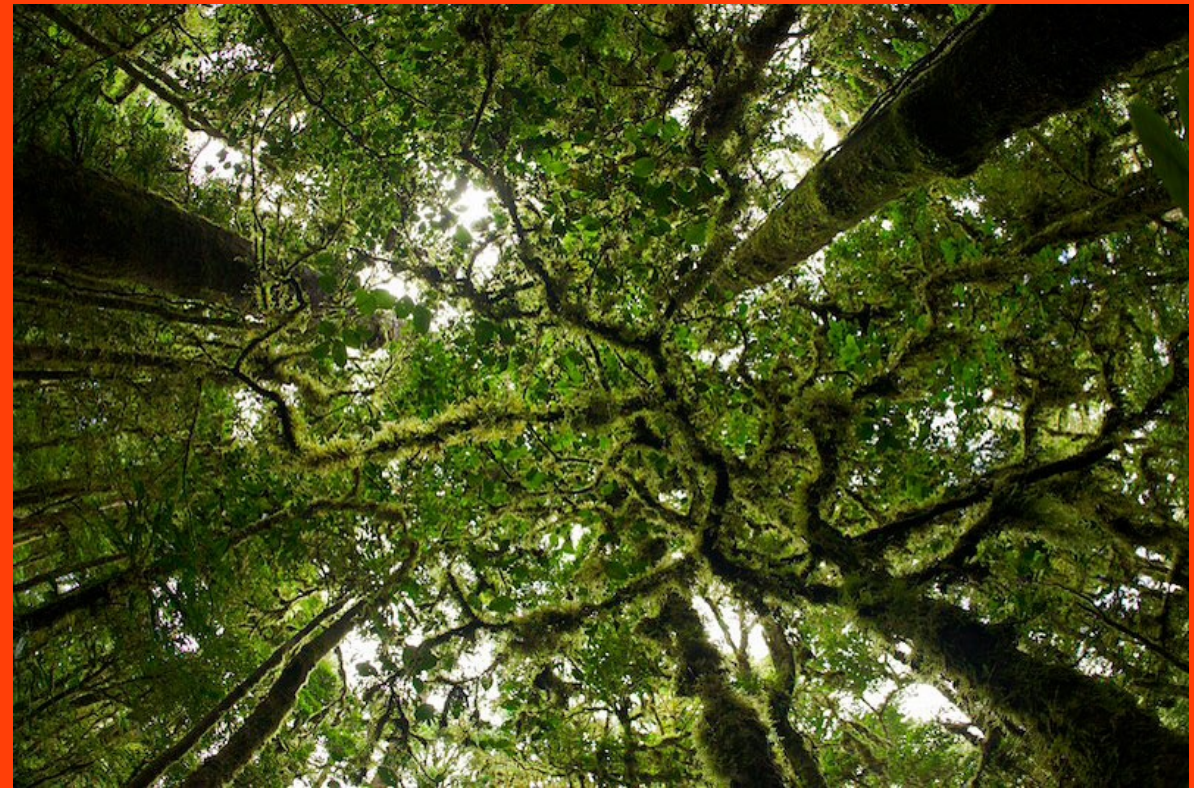

Adaptation is to help animals to blend in with the things around it.

Canopy: is the top of the rain forest.

Under story is under the canopy.

Forest floor is way down in the bottom of the rain forest.

Hello my name is H'sia I'm in the first grade.

This is my third book and I am happy to share it with you. I wrote about rain forest. I hope you enjoy my book. I like to jump rope and do ballet and also go on stag and check out interesting things.
