Don't touch me14-18

Extinction??.....18-20

*The ocean is wet, deep, cold, full
of rocks*

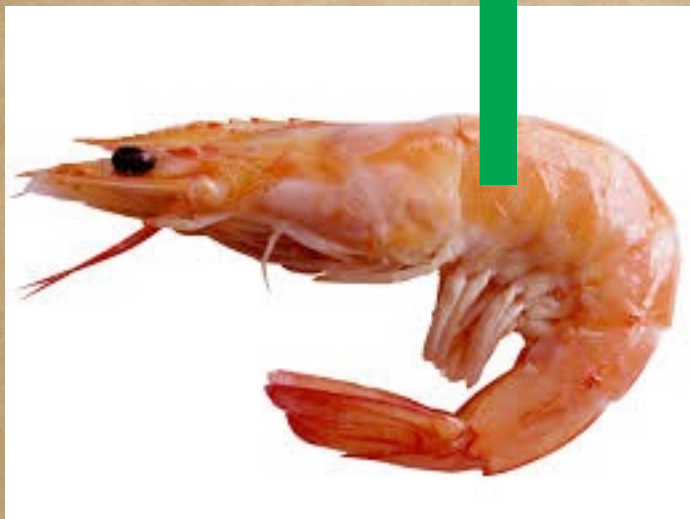

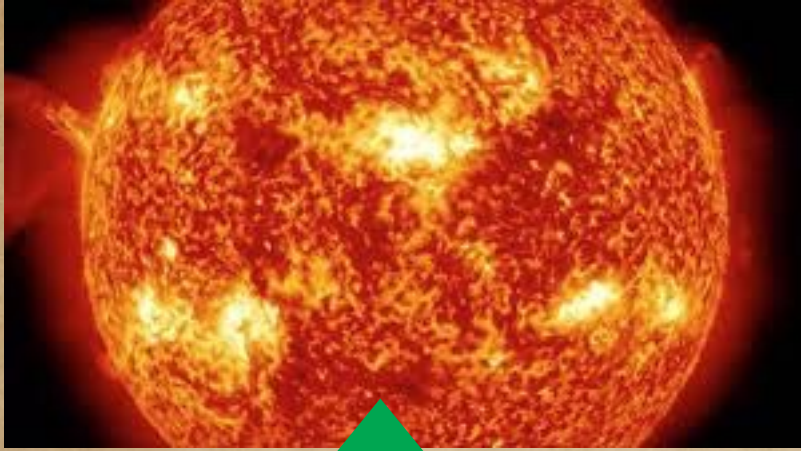

Don't touch me

ocean have adaptations. A adaptation is like a puffer
fish has spikes. A adaptation is how animals survive.
One Adaptations is all fish have Gil's all sarks have lots
of teeth

Oh no!!!!!!!!!!!!!!!!!!!!!!

*A sark eats fish fish eat
shrimps shrimps plants
plants get energy form
the sun*

Splas

Where is
dangerous? Where
do lots of animals
live? Where is wet?
Where do lots of
predators live that
are fast quite? it's
a ocean!!!

The ocean is important because lots of animals live in the ocean. To help the ocean people can throw less trash in the ocean. On a field trip four kids pick up over four hundred pieces of trash that shows that lots of people throw lots of trash. If people use so much plastic then the ocean will be much more clean. People can help by throwing their trash in the trash bin

Glossy

PPPPPP

Ocean a big pool of woter

Preditor a dangros animal that livis in the ocaen

Fish lots of small animls that livi in the ocaen
