

Rainforests

By Ruby

Table of contents

Wellcome to rainforest!

What is rainforest?

What animal live in Rainforest?

Rainforest's food chain!

Camouflage in the rainforest!

Help the rainforest!!!

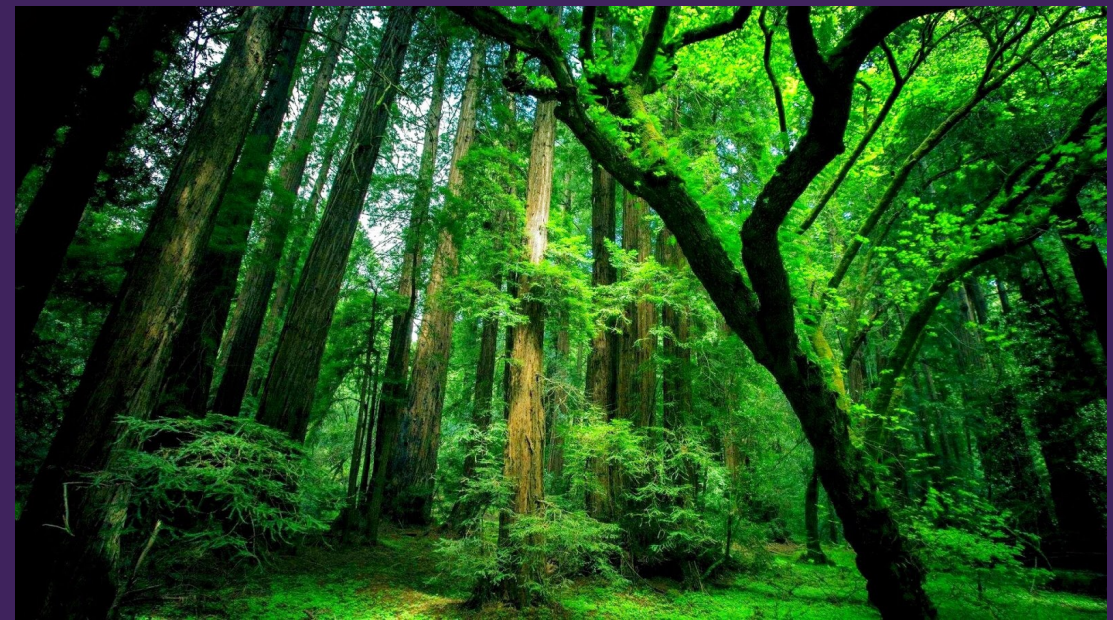

Author

Welcome to rainforest

Have you ever been to rainforest?

I think you been to rainforest but, you can not remember!

Rainforest has good air so you could see many plants and animals

What is rainforest

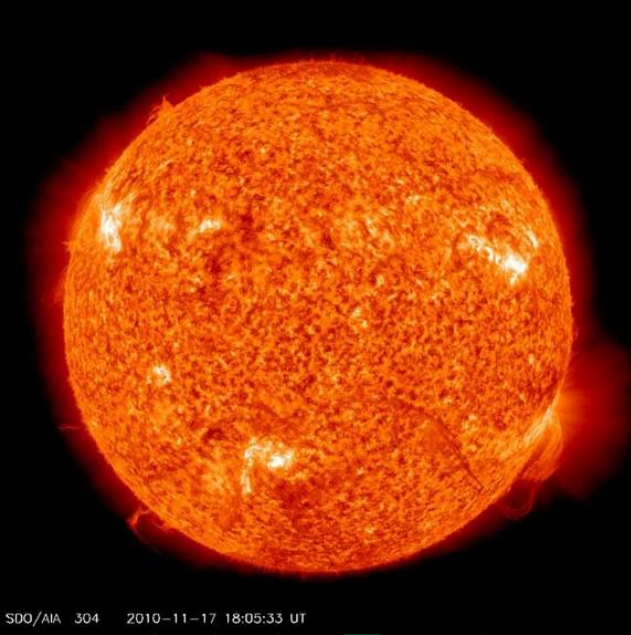

***RAINFOREST IS FOREST THAT
HAS MANY ANIMALS AND
PLANTS.***

IT HAS GREAT AIR TOO!

In rainforest, many animals like lizards, jaguars, monkeys, tigers, snakes live in the rainforest.

Rainforest's food chain

Camouflage in the rainforest

Adaptations are some things animals use when there in danger.

They use Adaptations so they don't get eaten.

For example Tree Frog use camouflage so snake can't see them in the tree.

Dart Frogs use bright color to warn the predators that they have poison.

Adaptation are important because it can be survive.

Help the rainforest

When you want to save

the

rainforest, First, don't

cut many trees

second, don't kill

animals with gun.

Author

Ruby is in the 1 grade. She is so cute and smart. She made third book about the rainforest.
