The rainforest

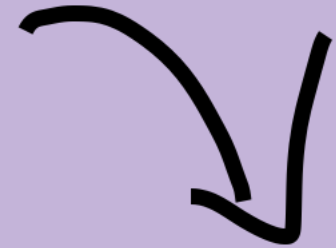

By Yuna

Welcome to the rainforest

Rainforest have lots of trees and animals. Rainforest have lots of plants, bugs and rain. The rainforest is in South America, Africa, and south-eastern Asian rainforest.

Food chain

The bunny eats the carrots and the eagle eats the bunny.

Adaptation

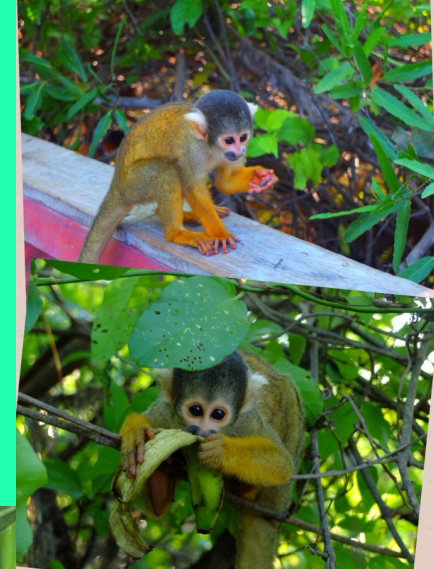

Adaptation is that animals camouflage to blend in their surroundings. One example is a snake which has the same color with trees.

Welcome to the rainforest!

Welcome to the rainforest. Haer is very hot and lots of green trees. Don't bring the bannas because the monkey will steal it. Don't get lost because the corcodile can eat you.

Protecting animals

If you want to save the rainforest don't cut lots of trees. Don't cut lots of trees because if you cut lots of trees you cannot brith anymore and you will die. Let's plants the seeds thogerer. please?

Animals and plants

There are lots of kinds of animals. There is butterflys, tigers, mucks, frogs, birds, and bat. There is lots of kinds of plants. There is flowers, trees, grass, and the levels.

About the author

My name is Yuna. I am in the first grade. I worked hard to finish my book. I wrote about rainforest. I hope you enjoy my book!

Glossary

Camouflage: hide and disguise themselves

Adaptation: Animals camouflage to blend in with their surroundings
